Professional Summary:

Detail-oriented Data Analyst with 3.8+ years of experience in data visualization, reporting, and ETL using Power BI, SQL, and Python. Proven ability to derive business insights and streamline reporting processes for enterprise clients. Adept at creating dynamic dashboards, optimizing data pipelines, and communicating findings to stakeholders.

Core Skills:

Programming Language: Python.

Libraries: Pandas, NumPy, Matplotlib.

Business Intelligence: Power BI Desktop & Service.

Power BI: Dashboard development, DAX, Power Query, Report automation

Data Modelling: Performance-optimized models, handling large datasets

Databases: MySQL, SQL Server.

ETL & Data Integration: Connecting Power BI to multiple data sources.

Databricks: Basic knowledge of collaborative analytics workflows.

Analytical Skills: Data-driven problem solving and insights generation.

Communication: Clear presentation of technical findings to stakeholders.

Professional Experience:

Cognizant Technology Solutions ·

September 2022 - Present

Data Analyst

- Developed 15+ interactive dashboards using Power BI for sales, operations, and productivity tracking.
- Automated ETL processes using Power Query to transform raw datasets from SQL Server, Excel, and CSV.
- Developed complex SQL queries, including stored procedures and views, which improved data processing speed by 15% and enhanced analytics capabilities for over 10 use cases.
- Implemented DAX calculations for KPIs, aggregations, and time intelligence across business units.
- Designed data models and established table relationships to improve reporting efficiency.
- Collaborated with cross-functional teams to define data requirements and deliver actionable insights.

Projects:

Commercial Pharma Sales Analytics

- Implemented enhanced dashboard features, resulting in a 10% increase in decision-making efficiency for a major pharmaceutical client.
- Integrated secondary sales data and built custom visualizations for performance tracking.

Employee Productivity Dashboard

- Engineered a centralized Power BI dashboard integrating data from 5+ project management tools, providing real-time insights into resource allocation and project timelines for 100+ employees.
- Leveraged Power Pivot and DAX to track metrics like billable hours, project allocation, and efficiency.

Sales & Profit Loss Analysis

- Designed weekly sales reports by region, category, and product to support supply chain decisions.
- Used Power BI and SQL to extract, transform, and visualize performance trends.

Certifications:

Claude Certified Architect – Foundations.

Microsoft Certified: Power BI Data Analyst Associate (PL-300).

ServiceNow System Administrator Certification.

Education:

Bachelor of Technology (B. Tech), KIIT University, Odisha Jul 2018 · Aug 2022
